

GILES ENGINEERING ASSOCIATES, INC.

Our Industrial Hygiene and Indoor Air Quality services can help keep your home or workplace safe, healthy, comfortable, and compliant.

Giles' Industrial Hygiene (IH) services investigate, identify and evaluate factors that affect the health and well-being of inhabitants. We provide IH assessments to document existing conditions and help develop solutions.

Giles' IH Assessments include:

- Visual inspection
- Sample collection
- Occupant interviews
- Field and laboratory tests

Keep your home or workplace...

Safe

A Giles IH inspection includes tests that can identify:

**Toxic gases
Hazardous chemicals
Lead
Asbestos**

Healthy

Our Indoor Air Quality Assesments provide information about:

**Dangerous fumes
Mold
Bacteria
Other pollutants**

Comfortable

We look for the following factors that can affect workers and occupants:

**Excessive noise levels
Vibration
Lighting issues**

Compliant

Our trained professionals can help with your:

**Safety program development
Safety program training
Compliance audits**

Contact **Giles Engineering Associates, Inc.** for more information about our Industrial Hygiene and Indoor Air Quality services.
