

**Post-construction
stormwater
management regulations
are in effect in
many states.**

Do they apply to you?

GILES ENGINEERING ASSOCIATES, INC.

States across the country are promulgating tough new standards to achieve compliance with standards regarding post-construction stormwater management. To determine whether your project is affected by the new regulations, call **Giles**.

With only a few exceptions, nearly all future developments will be affected by these new rules. It is important from a legal and cost perspective that the new regulations be considered during the planning stage of development.

Giles is the right company to help you comply with the strict new laws, provide you with design options, avoid delays associated with non-compliant review and, most importantly, get your project in the ground!

Who is Giles...

Giles Engineering Associates, Inc. has been providing geotechnical (soils) engineering, environmental consulting, construction materials testing, indoor air quality evaluations and drilling services on a local and national basis for almost 30 years. Most people in the development industry know us by name and by reputation.

How we can help...

Giles will perform an economical and thorough site evaluation for the feasibility of infiltrating stormwater at your site. **Giles'** stormwater management services include:

- Test borings and test pits for subsurface site evaluation, including identifying depth to groundwater and bedrock
- Accurate soil classification using particle size analysis, including hydrometer analysis (ASTM D422) and the USDA textural classification system
- On-site measurement of infiltration rates using Double Ring Infiltrometer (ASTM 3385) or other appropriate methods to provide parameters for the most economical design of infiltration devices.
- Where infiltration is not feasible, **Giles** will provide parameters for detention basin design in accordance with local technical standards.

To learn more about post-construction stormwater management, or the other services we provide, please **call Giles today at 1-800-782-0610** or visit us on the Web at **www.gilesengr.com**.
